## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaczynski et al (JP403091614) in view of Carter et al (5,791,308) or Kobayashi et al (JP358048621) Baldi et al (5,077,257).

Kaczynski et al discloses substantially the claimed features including an electrically heatable glow plug 1, having a corrosion-resistance glow pipe 3, and coils 7 and 8 embedded in an insulation powder 6. However, Kaczynski et al does not disclose that coils are hardened by diffusion treatment and the diffusion treatment is nitriding. Carter shows a surface-hardened electric coil 6, and Kobayashi shows an electrical hardening coil 3. Baldi et al shows a diffusion treatment by nitriding with surface layer about 2.5 mills thick (Col. 9, lines 45-52). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use surface-hardened coils as taught by Carter or Kobayashi to withstand the mechanical stress during the compaction of the

powder filling, and use a diffusion by nitriding as taught by Baldi et al to increase hardness of the coils.

4. Applicant's arguments with respect to claims 5-16 have been considered but are moot in view of the new ground(s) of rejection.
